RAJA AMPAT

Raja Ampat, or the Four Kings, is an archipelago comprising over 1,500 small islands, cays, and shoals surrounding the four main islands of Misool, Salawati, Batanta and Waigeo. The stunning and spectacular landscape is matched with an equally fantastic underwater realm.

An amazing diversity of habitats is home to an incredible number of species of fish and soft and hard coral gardens. Dunia Baru sets sail to the most beautiful areas where diving is truly breathtaking!

October to March

KOMODO

Spectacular Komodo, its steep hillsides green in the short wet season, and russet the rest of the year, is the largest island in the Komodo National Park. Home to its native Komodo Dragon, the World Heritage Site has other unique fauna including civets, deer, cockatoo and macaques.

Komodo boasts one of the richest and most colourful marine environments in the world with abundant colourful coral reefs and a stunning variety of marine life.
